

Advanced Bank Loan Data Analysis: Empowering Decision-Making through Dynamic Insights

Problem Statement: Advanced Dashboard Development for Loan Data Analysis. The current approach to loan data analysis lacks depth and interactivity, hindering the ability to derive meaningful insights for informed decision-making. Traditional reporting methods fall short in providing a comprehensive view of lending operations, borrower behavior, and loan performance metrics. There is a pressing need for advanced dashboard design to address these limitations and unlock the full potential of our loan data.

Objective: Our objective is to craft a suite of interconnected dashboards that deliver dynamic and comprehensive insights into our loan data, empowering decision-makers with actionable intelligence derived from robust data analysis. These dashboards are meticulously designed to offer a holistic perspective on our lending operations, borrower demographics, loan performance, and financial metrics, facilitating strategic decision-making based on data-driven insights.

Dashboard 1: Executive Summary

Purpose: This dashboard provides an overview of critical Key Performance Indicators (KPIs) essential for evaluating the overall efficiency and performance of our lending endeavors.

Key Features:

- **Total Loan Applications:** Monitor total and Month-to-Date (MTD) applications, scrutinizing Month-over-Month (MoM) trends for actionable insights.
- **Total Funded Amount:** Evaluate the cumulative disbursed funds and track MTD disbursements, analyzing MoM variations to discern funding patterns.
- **Total Amount Received:** Assess cash inflows via total and MTD received amounts from borrowers, scrutinizing MoM fluctuations for financial health assessment.
- **Average Interest Rate:** Determine the cost of lending by computing and tracking the average interest rate across all loans, including MTD and MoM changes.
- **Average Debt-to-Income Ratio (DTI):** Evaluate borrowers' financial resilience by calculating the average DTI for all loans and monitoring
